

Use-Case Specification

Submit Adoption Application

Use Case Name: Submit Adoption Application

Primary Actor: Adoption Applicant

Secondary Actor: Shelter Staff

Preconditions:

1. The applicant has registered and logged into the portal.
2. The selected animal has the status set to 'Ready for Adoption'.

Postconditions:

1. The adoption application is submitted, linked to the pet's profile, and assigned the status 'Pending Review'.
2. An automated confirmation email is sent to the applicant, and a review task is added to the shelter staff queue.

Main Success Scenario:

1. The applicant browses the catalog, filters pets, and clicks the "Apply to Adopt" button on the chosen pet profile.
2. The system displays the multi-step Adoption Screening Questionnaire (household environment, pet history, references).
3. The applicant completes the questionnaire fields.
4. The system prompts the applicant to upload proof of identity and residence (<<include>> (use case: Upload Proof of Residence / ID).
5. The applicant uploads valid document files (PDF/JPEG).
6. The system validates all form fields and verifies that required document attachments are present.
7. The applicant reviews the submission summary and clicks "Submit Application".
8. The system encrypts the submitted data, generates a unique Application Reference ID, and stores the record.

9. The system saves the application and notifies Shelter Staff of the new pending submission.
10. The system displays a success confirmation page, and the use case ends successfully.

Alternate Flows:

1. 6a. Incomplete Form or Missing Required Documents:
 - a. 6a1. The system detects empty mandatory fields or missing identity proof attachments.
 - b. 6a2. The system highlights the invalid fields in red with specific error prompts.
 - c. 6a3. The applicant corrects the input or re-uploads valid files and resubmits (returns to Step 6).
2. 4a. Applicant Requests Optional Home Visit (<<extend>> use_case:Request Home Visit Screening):
 - a. 4a1. The applicant checks the box to request a pre-adoption home screening visit.
 - b. 4a2. The system prompts the applicant to select a preferred date and time window.
 - c. 4a3. The visit request is appended to the main application payload (continues to Step 5).
